

COVID-19 Rapid Testing

Patient-Centred Care
Digital Innovation

Rapid COVID-19 Test (with Results+ Patient Reporting)

Our Covid-19 Screening Kit is designed to provide quick, accurate, and easy-to-interpret results within just 15 minutes, ensuring that you can take prompt action in managing health and safety.

Our new Results+ platform has been integrated with this test to quickly and efficiently provide test results to your consumers on the spot!

Identify nasal specimens with 90.2-95% accuracy.

Obtain results in just 15 minutes.

Identify the presence of SARS-COV-2.

Patient-Centric Services

Improve patient care by offering value added screening services in-store. Pharmacists can help address current backlogs within hospitals & clinics and minimize the strain on the Canadian healthcare system

Digital Innovation with Results+

As healthcare delivery evolves and digital innovation persists, we want to help bridge the gap between medical device and software. Capture test images and print and/or email results with one click of a button!

Accuracy & Reliability

Excellent correlation to laboratory results. Quick, accurate & reliable results for enhanced healthcare.
