FebriDx Product Information

What is FebriDx?

FebriDx is a rapid point-of-care test that uses a fingerstick blood sample to detect and aid in differentiating bacterial from viral acute respiratory infection in 10 minutes.
What are the benefits of using FebriDx?

Knowing whether a patient has a viral or bacterial infection may have a direct impact on reducing unnecessary antibiotic prescriptions, limiting the spread of antibiotic-resistant bacteria and helping providers know when to initiate treatment.

Benefits of Using FebriDx

Increase confidence in decision making

Confidently rule out a bacterial infection with 97-99% negative predictive value (NPV)7 and ensure serious infections are not overlooked.

Improve patient satisfaction

Gain patient acceptance of their treatment plan by offering a tangible test result.

# Benefits of Using FebriDx

Enable improved patient management

Actionable results in 10 minutes for use during a patient visit.

Support antimicrobial stewardship

Reduce unnecessary antibiotic use among those most vulnerable.

Patient Population Management
