SpecCheck Rapid HbA1c Test (with Results+ Patient Reporting)

The HbA1c Rapid Test Cassette (Whole Blood) is a rapid chromatographic immunoassay for the semi-quantitative estimation of human HbA1c in whole blood as an aid in the monitoring of diabetes mellitus.

Our new Results+ platform has been integrated with this test to quickly and efficiently provide test results to your consumers on the spot!

Identify whole blood specimens with
99.1% Accuracy

Obtain results in just 10 minutes

Identify from a range of <6%, 6-9%,
>9%

Patient-Centric Services

Improve patient care by offering value added screening services in-store. Pharmacists can help address current backlogs within hospitals & clinics and minimize the strain on the Canadian healthcare system

Digital Innovation with Results+

As healthcare delivery evolves and digital innovation persists, we want to help bridge the gap between medical device and software. Capture test images and print and/or email results with one click of a button!

Accuracy & Reliability

Excellent correlation to laboratory results. Quick, accurate & reliable results for enhanced healthcare.
