What our clients are saying:

"Since 2009, Spectrum MDX has been a consulting partner in our Workplace Safety program. Our injury and lost work hours have been reduced since we implemented a mandatory drug and alcohol screening protocol.

Through education, Spectrum MDX played a critical role in advising our management team with best practices—and as a result, employees are equipped with point-of-care resources and how to make positive choices."

- David - Occupational Health Clinic, Alberta

"Spectrum has been extremely efficient and easy to work with they kept information simple and were always swift to respond to questions with clear concise answers. After switching to Spectrum, there was a large improvement in morale.

People were obviously concerned as to the whole idea of working during a pandemic, so working with Spectrum allowed us to keep people informed and calm while at work. This in turn ensured our customers were never let down."

- Hamid - Mining company, Ontario

"The service has always been fast and efficient and always very personal and friendly—one quick call or email and our orders are ready to go and the billing is straightforward with no hiccups or surprises.

When you work in a high-stress industry with a lot of surprises, it is nice to be able to rely on partners like Spectrum to meet our organizational needs with such trustworthy professionalism and responsiveness."

- Jeremiah - Recovery Centre, Alberta
