

Spectrum PureGuard™ Emergency Water Filtration Kit

Portable, patented protection — delivering medical-grade water purity in any emergency

Emergency Water Filtration Kit

Kit includes a straw, bottle and inline filter. Reusable and quick to install means more clean water for more people FASTER.

Ultra filters use electropositive media to quickly adsorb particles of varying sizes, from tens of microns to a few nanometers, resulting in high particle capacity for each of our filters.

Filter ANY freshwater source into potable water with no power, ultra low pressure and no wastewater.

On Demand Clean Water

Drink from virtually any source; a stream, a lake, an old water pump and more. Simply fill the bottle or simply drop the straw into your favourite cup or water bottle. The straw can even be used straight from the water source!

The advanced filtration media was originally developed for NASA and has incredible dirt and microbe retaining properties & filters over 99.99% of bacteria, viruses, spores and cysts
