

Spectrum PureGuard™ TapSaver

Safe Water for Every Home and Community

Powered by Toppen Health

Because Health Begins with Clean Water

Every day, millions of families across Africa face health risks from unsafe water.

The Spectrum PureGuard™ TapSaver provides trusted, medical-grade water protection — helping communities prevent illness, reduce infections, and protect children and families from waterborne diseases.

Developed using patented nanoceramic filtration technology, the TapSaver brings hospital-quality purification right into homes, schools, and communities — with no power, no chemicals, and no maintenance required. **The only system of its kind, delivering safe drinking water instantly!**

Spectrum PureGuard™ TapSaver Delivers:

- 99.99999% bacterial reduction (>7 LRV*)
- 99.999% virus reduction
- 97.2% lead reduction
- 95% PFAS (forever chemicals, PFOA/PFOS) reduction
- 99% reduction of VOCs, microplastics, and other heavy metals

*Log Reduction Value (LRV) verified under standardized laboratory testing conditions.

How It Helps Your Community

- Protects families from waterborne diseases such as cholera, typhoid, and diarrhea
- Reduces bacteria, viruses, and parasites from tap and well water
- Lowers exposure to lead, PFAS, and harmful chemicals
- Improves taste, odor, and clarity of water
- Easy to install — no electricity or wastewater needed

Designed for Real-World Conditions

- Works with tap, tank, or borehole water
- Durable design for urban and rural settings
- Compact and easy to install under any sink or community tap
- No salt, electricity, or special maintenance required
